# **GENERAL SPECIFICATIONS AND SCOPE OF WORKS**

## **GENERAL SPECIFICATIONS AND SCOPE OF WORKS**

### **1.0 SCOPE**

The work under this section consists of supplying, installing, testing, registration and commissioning of all material and services of the complete 1000 KVA oil immersed transformer, as given in the Bill of Quantities.

The bidder shall be deemed to have considered the scope of work, all the conditions, obligations and requirements by visiting the site before quoting rates against items of Bill of Quantities, inspected the site and satisfied himself as to the nature of work, ground, the hydrological and climatic conditions, availability of materials, means of access to the site for manpower/machinery, risks, contingencies and other circumstances which may influence or affect his Tender.

The bidder shall discuss the electrical layout with the Engineer and co-ordinate at Site with other services for exact location and position of the 1000 KVA oil immersed transformer, and routing of cables.

### **2.0 GENERAL**

The 1000 KVA oil immersed transformer shall be of a standard design of reputed manufacturer, who shall have similar units in operations for similar applications and field conditions. The manufacturer shall also have adequate maintenance facilities in vicinity of the Project with technically qualified and experienced personnel trained for operation and on-site maintenance of equipment offered by the Contractor in the tender bid.

The bidder shall submit the equipment layout and other installation details as per manufacturer's recommendations for approval of the Engineer at least 15 days prior to the installation of the set.

Necessary provisions, including connections of 1000 KVA oil immersed Transformer to the HT/LT panels. The cost of such provision, connection, testing and commissioning are deemed to be included in the Cost of 1000 KVA Oil Immersed Transformer and no separate payment shall be made against such works.

### **3.0 PRE- SUPPLY INSPECTION & TESTING:**

Complete tests shall be carried out at the manufacturer's works to determine the performance and operating characteristics of the transformer to determine whether or not the guaranties have been met, unless otherwise specified. All the routine tests shall be carried out in accordance with the standards and shall be witnessed by the representatives of the purchaser. Manufacturer test certificate with manual in triplicate shall be supplied by the vendor.

#### **4.0 INSTALLATION & TESTING**

The transformer and associated equipment with accessories shall be installed at location shown on the drawing. The contractor shall ensure execution, coordination with the civil works for providing any openings, holes etc to avoid any breakage to completed works. The Contractor will arrange all allied civil works for complete execution of the job at his own cost and to the satisfaction of Engineer. The contractor shall provide foundation bolts and grout them in cement concrete floor using non-shrinkable material with the approval of Engineer.

All installation materials for physically installing the transformer and associated equipment, such as bolts, nuts, washers, supporting steel, etc; shall be provided and installed by the Contractor.

The transformer shall be completely erected as per manufacturer's instructions and as approved by the engineer. Loose parts dispatched by the manufacturers shall be installed and connected as per assembly drawing provided by the manufacturer. Any safety locking of meter, relays, etc provided by the manufacturer for safe transport shall be released only after the transformer / control panel is erected in position.

The incoming and outgoing cables shall be connected as recommended by the cable manufacturer. The cable armor shall be connected effectively to ground.

The transformer and associated equipment body shall be connected to earth as per instructions given in section "Earthing of these Specifications". The transformer shall be tested on full load for at least 08 hours and commissioned in the presence of the Engineer/ representative of the client.

#### **5.0 MEASUREMENT AND PAYMENT**

The contractor's bid amount against each item of Bill of quantities as given below shall include supply, installation, testing, commissioning and for all work specified herein and / or as shown on the tender drawing / B.O.Q related to the item

#### **6.0 TRANSFORMER:**

##### **6.0.1 Measurement**

Measurement shall be made for the transformer including, connection with HT/LT switchboard etc acceptably supplied and installed by the contractor as a complete job.

##### **6.0.2 Payment**

Payment shall be made for the number of jobs measured as provided above at the contract unit price each for supplying installing, testing, commissioning and completion of transformer including HT/LT. connection, all testing arrangements, etc.

## MANDATORY REQUIREMENTS

- i. GST, PST, NTN Certificate, PEC registered in the relevant field.*
- ii. Affidavit that the firm/company is not black listed by any Government/Semi Government/MNCs and private organizations.*
